

P SANGAM

AI Software Engineer

Bengaluru, Karnataka · +91 9035836305 · sangamgowda64@gmail.com · linkedin.com/in/sangam-gowda2128

SUMMARY

AI Engineer specializing in the design and development of AI-driven platforms spanning Machine Learning, Deep Learning, Computer Vision, Predictive Analytics, and Generative AI. Experienced in developing AI-powered applications, integrating ML models into business workflows, and translating complex technical concepts into practical solutions for stakeholders. Possesses strong problem-solving skills, systems thinking, and a proven ability to bridge business objectives with practical engineering execution. Interested in building scalable, resilient, and production-ready AI ecosystems.

CORE SKILLS

AI & ML: Machine Learning, Deep Learning, Computer Vision, CNNs, Transformers, Time-Series Forecasting, Predictive Analytics, OpenCV, YOLO

Generative AI: LLMs, LangChain, RAG, AI Agents, Prompt Engineering, Vector Databases, Agentic Workflows

Systems: AI Solution Design, System Design Fundamentals, Technical Trade-off Analysis, Decision Intelligence, MLOps, Model Lifecycle Management, Docker, Git, FastAPI, CI/CD Fundamentals

Professional: Problem Solving, Critical Thinking, Technical Presentations, Stakeholder Communication, Requirement Analysis, Agile/Scrum

Languages: Python, C, SQL, ReactJS

EXPERIENCE

EAGE Technologies India Pvt. Ltd.

AI Software Engineer

Bengaluru, KA

Feb 2026 – Present

- Designed and implemented ML and DL forecasting, digital twin simulation, and AI-assisted decision support components for solar intelligence platforms.
- Integrated forecasting models, weather services, rule-based risk analysis, and LLM-based reasoning into a unified decision support workflow.
- Conducted technical presentations and solution walkthroughs for leadership and business stakeholders to support product strategy and commercialization.
- Designed and developed an IoT-to-cloud Agri-Soil Intelligence system with GSM-based sensor ingestion, location-aware soil health prediction, and an extensible decision orchestration pipeline.

Research & Development Intern

Jul 2025 – Jan 2026

- Conducted research and development of Machine Learning and Deep Learning solutions across predictive analytics, computer vision, and forecasting use cases.
- Evaluated AI models through experimentation, data analysis, and performance validation to support solution development.

Code Nimbus Solutions Pvt. Ltd.

AI & Frontend Intern

Bengaluru, KA

Sep 2024 – Jun 2025

- Developed AI-powered facial recognition pipelines using deep learning and embedding extraction techniques.
- Built user interfaces for AI applications enabling visualization of model outputs and operational workflows.

PROJECTS

Solar Intelligence Platform: Developed an AI-enabled decision support platform integrating forecasting models, digital twin simulations, predictive analytics, and LLM-assisted reasoning to improve operational intelligence and support informed decision making.

Soil Intelligence Platform: Designed an AI-based agricultural intelligence platform leveraging predictive analytics, climate risk assessment, disease prediction, and LLM-powered advisory systems for data-driven recommendations.

HelmSecure: Developed a real-time computer vision system for helmet detection and rider authentication using deep learning techniques with emphasis on AI model performance and deployment.

EDUCATION

SDM Institute of Technology

B.E. in Artificial Intelligence & Data Science

CGPA: 7.69

Ujire, Dakshina Kannada

2021 – 2025
